"A SPRIG OF SPRUCE"

Vermonters everywhere are reminded of the Green Mountains of their native State,whenever they see a Spruce tree.Always have we boasted of our wealth of forest beauty.And at this season,as Autumn closes,and Winter looms ahead,with mountain tops already white with snow,it is with more than a feeling of pride,that we look up at our green hillsides.In their green,we see a steadfast purpose to oppose the coming cold,and a promise that some day again,barren branches and brown hillsides will be as green as they.

From these hillside forests,many things can be sent you,to help decorate and cheer your homes during the Holiday season,just ahead. We offer them in the following pages.

HOLIDAY DECORATIONS.

For Thanksgiving and Christmas gatherings,various kinds of cut branches are used,many being available that are not commonly thought of,or even known.For the earlier holiday,Oak sprays are usually available,tho they need to be cut in advance.Barberry and Bittersweet sprays too,are satisfactory at this time.With hard freezing they lose their freshness.May we have your orders for these,quite early,please, remembering that Thanksgiving is the 31st this year.

All Evergreen sprays are fine for Christmas,but those with cones are most favored.Hemlock is the most attractive of these.Spruce are fine if heavy sprays can be used.Red Cedar with its blue berries, is useful,too.Then there are the stems of Osier,bright red.And the brown catkins of the Alder and the Birch.Pine Cones,Spruce and Hemlock Cones are nice to scatter on a table,or in packages you are mailing. Coarse White Pine cones for the Fireplace.Fern fronds,and Partridge-berry.Tiny ferns for Solariums.

Evergreen boughs without cones,have various uses.Balsam and Yew make the best wreaths.Yew particularly,lasts well,and is useful in vases.Many use short stems of these for Porchbox filling.Spruce,White Cedar,and Hemlock may be used to cover large areas in decorating,at low cost.

Christmas Trees,either cut,or with roots,for tubbing.All Nursery grown,these trees,fine bushy symmetrical plants,at a cost to compare with wild trees.

Combinations of these materials,in boxes,and made up in various forms.Useful,if you want a'different'gift for some friend.

We are sure that if you read these pages over,many combinations or uses will occur to you,that we haven't thought of.
